AIRCRAFT MAINTENANCE TECHNICIAN

Aircraft Maintenance Technicians (AMT) play a critical role at Delta as they maintain the proper and safe functioning of our fleet, maintain aircraft, aircraft engines, aircraft components, and avionics systems according to Delta and FAA specifications. AMTs perform inspections during assembly of parts and after repair or installation of components, document procedures and practice safety conscious behaviors in all operational processes and procedures.

MINIMUM QUALIFICATIONS

- Must have a valid FAA Airframe and Power Plant license to apply.
- Must have a valid driver's license and authorized to work in the US
- Must be at least 18 years of age with a high school diploma or GED equivalent
- Must be able to pass an extensive background
- Must pass a DOT required pre-employment drug screen and thereafter submit to DOT mandated random drug and alcohol testing
